Educational Training

- WAP Institute – ADSE (Advanced Diploma in Software Engineering) (2020)

- Veer Bahdur Singh University - BCA (2018)

- Adarsh Inter College – 12th (2017)

- Prabhu Narayan Government Inter College - 10th (2015)

Projects

Lensbazaar E-commerce

Description: Developed a full-fledged e-commerce platform allowing users to browse, search, and purchase products with a secure checkout system.

Role: Full Stack Developer

Responsibilities:
- Designed and implemented RESTful APIs using Node.js and Express for backend functionalities.
- Developed interactive user interfaces using React for seamless navigation and improved user experience.
- Implemented user authentication and authorization using JWT for secure access to sensitive routes.

Technology Use:
- MERN stack (MongoDB, Express.js, React, Node.js), JWT for authentication, Git for version control, and Bootstrap for frontend design.

Macquarie: Stock Market Analysis Platform

Description: Developed a full-fledged e-commerce platform allowing users to browse, search, and purchase products with a secure checkout system.

Role: Full Stack Developer

Responsibilities:
- Engineered RESTful APIs using Node.js and Express to fetch and update real-time stock data from external sources.
- Integrated MongoDB for storing historical stock data and user portfolios, optimizing database performance for efficient querying.
- Implemented user authentication and role-based access control using JWT and managed user sessions securely.

Technology Use:
- MERN stack (MongoDB, Express.js, React, Node.js), JWT for authentication, external APIs for real-time data, Chart.js for data visualization, Git for version control.

Career Summary

JookBox

july 2020 - Mar 2021

- Working with front-end and back-end developers on projects.Recorded and reported on work done in Node.js

TechnoSoftwares

Jun 2022 - Present

- Team management
- Troubleshooting issues in the implementation and debug builds.

Lensbazaar

july 2020 - Mar 2021

- Maintained web-based applications.
- Projects deploy on server sites.
